

Almac Diagnostics Ltd
Website: <http://www.almacgroup.com>
Location: Craigavon, Co. Armagh, N. Ireland
Expires: June 30, 2009

The Role

An opportunity has arisen for a highly motivated and experienced Bioinformatics scientist to join a leading edge genomics company. As Bioinformatician or Senior Bioinformatician, you will be responsible for the experimental design, bioinformatics analysis and functional interpretation of a wide range of genomics projects. You will apply available and, if necessary, develop and adapt new data analysis methods and ensure their correct and rational use. In addition, you will play a leading role in the expansion of the data analysis capabilities of the company, with a specific focus on functional analysis development.

Requirements

The position requires a post graduate qualification in Bioinformatics or a related discipline and an experience of providing Bioinformatics support to genomics projects in a commercial or academic setting. The successful candidate will be familiar with a range of methods and techniques used in the statistical analysis and functional analysis of microarray gene expression data. The successful candidate will have good biological knowledge, ideally in area of cancer, and hands-on experience of working with biological enrichment methods and tools, such as GO enrichment tools, Gene Set Enrichment Analysis as well as experience in in-silica pathway analysis using commercially or publicly available software. Experience analysing other multi-dimensional data, such as SNP data, would be an advantage. The candidate will also have excellent verbal and written communication skills and ability and interest in mentoring junior Bioinformaticians. Experience of working in multi-disciplinary teams involving bioinformaticians and biologists is essential.

Reward

An attractive remuneration package will be offered and will include 34 days holiday per year (including 5 fixed closure days), company pension scheme, enhanced sick pay and maternity entitlements, healthcare plan and opportunities for learning and development
