GENEGO ANNOUNCES LICENSING AGREEMENT WITH BIOGEN IDEC

St. Joseph, MI. August 28th, 2007 –GeneGo, Inc., the leading systems biology tools company, announced today that Biogen Idec (NASDAQ: BIIB) licensed its data analysis suite, MetaCore. Biogen Idec researchers can study their proprietary experimental data in the context of seven functional ontologies and unique merged metabolic/signaling networks. Importantly, MetaCore manually curated content now covers 12 organisms, and enables concurrent analysis of virtually any type of OMICs data including SNPs, MPSS files, microarray gene expression, proteomics, metabolomics and custom interactions.

“Biogen Idec is such a great success story and we are pleased to help them in future achievements,” said Julie Bryant, GeneGo’s VP of Business Development. “The field of mammalian systems biology tools is mature by now, and they had multiple choices. We are glad they chose MetaCore.”

About GeneGo, Inc.

GeneGo, Inc. develops systems biology technology such as compound based [pathway analysis](#), cheminformatics & [bioinformatics software](#) for life science research. The original computational MetaDiscovery™ platform allows an integration and expert analysis of different kinds of experimental data (mRNA expression, [proteomics](#), metabolomics, microRNA assays and other phenotypic data) and relevant bioactive chemistry (metabolites, drugs, other xenobiotics) within the framework of curated biological pathways and networks. GeneGo’s flagship product, MetaCore 4.3™, assists pharmaceutical scientists in the areas of target selection and validation, [data mining](#) in biology, identification of biomarkers for disease states and toxicology. The second product, MetaDrug 2.0™ is designed for prediction of human metabolism, toxicity and biological effects for novel small molecules compounds. MetaBase™ represents the knowledge base for MetaCore.
