FIRST CLASS PROFESSIONAL SERVICES FROM GENEGO, A THOMSON REUTERS COMPANY

THOMSON REUTERS™

GeneGo, a Thomson Reuters business, is a world-leading provider of pathway analysis solutions, and offers their expertise and technology on a broad range of professional services.

Your company is unique, and with our Contract Research projects, you gain access to our multi-disciplinary team will help to investigate your OMICs data, giving you a competitive edge with custom insights based on function-centered quantitative analysis:

- Pathway and gene content biomarkers for
 - patient stratification
 - personalized medicine
- Drug repositioning and mechanism of action
- Toxicity assessment

Our Knowledge Management experts working on- and off-site will help to organize your data in easy-to-query, semantically consistent databases:

- Data curation and annotation
- Development of ontologies and controlled vocabularies
- Semantic-based data integration (e.g. internal and public)
- Custom disease pathway models
- Target dossiers

See first hand how the experts at Genego can impact your business with a free consultation. Contact us today to arrange your first appointment.

We outsourced prioritization of three compounds with respect to biologic potency and possible toxicity. Results allowed us to focus our testing saving us time and money.
