

Your GPS in Pathways Analysis

MetaCore™

Gene Expression and Pathway Analysis Software

GeneGo's unique canonical pathway algorithm gets you to your destination quickly using well established biological highways. MetaCore's integrated data mining platform puts you in the driver's seat with the tools you need for functional analysis of gene expression, metabolomic, proteomics, siRNA, SNP, HCS and other types of experimental data in the context of manually curated pathways. MetaCore™ is easy to use and includes free on-line training to get you on the road and up to speed.
