

## **Lab Researcher IV and Senior Researcher (Next Generation Genetic Sequencing)**

National Jewish Health located in Denver, Colorado invites BS, MS, and PhDs with expertise in next generation sequencing methods to apply for positions of Lab Researcher IV and Senior Researcher in the Center for Genetics and Therapeutics (Genes, Environment, and Health). The overall goal of this Center is to discover the etiology and understand the biology of immune-mediated conditions, infectious diseases, and lung diseases. The research projects will focus on using next generation sequencing to identify polymorphisms in genomic regions that have been linked to pulmonary diseases (targeted resequencing) and for studying gene expression and epigenetic regulation (DNA methylation, histone modifications and miRNA) in pulmonary diseases.

Lab Researcher IV position: must have a BS with 4 years of experience or a MS with 2 years of experience.

Senior Researcher position: must have BS with 6 years of experience or a MS with 4 yrs of experience.

- or - Any equivalent combination of Education and/or Experience

Interested candidates should apply online at [www.njccareers.org](http://www.njccareers.org)
