

SENIOR RESEARCHER

National Jewish Health, located in Denver, Colorado, invites BS, MS, and PhDs with expertise in genomic technologies to apply for the position of Senior Researcher in the Center for Genes, Environment, and Health. The overall goal of this Center is to discover the etiology and understand the biology of immune-mediated conditions, infectious diseases, and lung diseases. The Senior Researcher will be responsible for overseeing high-throughput gene expression and genotyping work in the Center. Strong background in high-throughput genomics work with a particular emphasis on the use of robotics is a must. In addition, applicants should have a proven record of performing gene expression and/or genotyping assays, including troubleshooting and instrument maintenance. The Center is equipped with Tecan Freedom EVO and Qiagen BRU robots, Illumina BEadXpress, AB 7900 sequence detection system, and all components required for processing of Agilent and Nimblegen microarrays.

National Jewish offers a complete benefits package to eligible employees including:

- Medical, Dental and Vision Coverage
- 403(b) Retirement Plan
- Flexible Spending Accounts
- Life Insurance
- Long-Term Disability Coverage
- Long-Term Care Coverage
- Employee Assistance Program
- Tuition Reimbursement (after 6 months of employment)
- Legal Plan
- Free Parking

Interested candidates may apply online at www.njccareers.org or submit their curriculum vitae and contact information for three references to Dr. Ivana Yang, National Jewish Health, 1400 Jackson Street, Denver, CO 80206 or yangi@njhealth.org.
